We are Nestlé

We make meals and snacks that complement busy days, and warm sips to savour with slow moments. We also make nutrition solutions to help you through different life stages. We make it all with a drive to constantly improve our products and our company.

It all started in 1867 with a man named Henri

Nutrition has always been at the heart of what we do. Our story began when Henri Nestlé developed the first milk-based baby formula for babies who were unable to feed from their mothers. His Farine Lactée formula actually saved the life of his neighbour's premature baby. You might say he was an olden day hero!

A lot has changed over the last 150 years. But our unwavering commitment to making good food hasn't.
